⑤ 次の文章をよく読んで，後の問題に答えなさい。

One day, Mayumi and her mother went shopping in a department store. Mayumi wanted to buy some shoes. She found two pairs of shoes that she liked at a shoe shop. One pair was 2,000 yen, and the other pair was 4,000 yen. But she found out that the shop was going to have a "Time Sale" — from one thirty to two o'clock in the afternoon. During the "Time Sale," every pair of shoes in the shop would be half price.

Because it was just noon, Mayumi and her mother went down to the food floor to buy some food. Her mother was going to cook curry for dinner that day, so she had to buy potatoes, carrots and meat. In the vegetable shop, potatoes and carrots were sold in 1 kg plastic bags. There were five potatoes in a bag and each bag was sold for 300 yen. Each potato was almost the same size. A bag of four carrots was 360 yen. Her mother bought one bag of potatoes and one bag of carrots. She also had to buy meat, so they went to the meat shop. In the meat shop, 100 g of beef was sold for 200 yen. Her mother bought 200 g of beef and 300 g of pork. She paid 700 yen for the meat.

After leaving the food floor, they went back to the shoe shop. They entered the shop just when the "Time Sale" started. Mayumi bought both pairs of shoes she found before.

（注）　price　値段　　curry　カレー　　beef　牛肉　　pork　豚肉　　paid　支払った

［問題］　本文の内容から考えて，次の問１〜問５の英文の（　　　）に入る適切なものをア〜エの中から
　　　それぞれ一つずつ選び，記号で答えなさい。

問１　One potato is about（　　　）.
　ア　60g　　　　　　　イ　100g　　　　　　　ウ　200g　　　　　　　エ　250g
